

The Salvation Army On Tues., Aug. 17th

Adjutant E. Davies, of the Salvation Army Training Garrison, for Canada West, will be visiting Coleman and giving a lecture entitled "Life in the Training Garrison," on Tuesday night, August 17th, at 8 o'clock in the Army Hall.

Adjutant Davies is an able speaker and she has a wide knowledge of Salvation Army work both in the Old Country and Canada West. She has laboured in the slum districts of London and has been in charge of many of the Army posts in England, Scotland and Wales, but now she is in charge of the women's work of the Salvation Army Training Garrison, Winnipeg. She is a product of the Army, coming up through our juniors, her father being Major Davies of the Salvation Army Emigration Dept., International Headquarters, London, England.

Come along and hear this interesting lecture. Everybody welcome.

Ten scouts of the Crusader Troop left on Wednesday, August 4th, in charge of Father McCormick, for a few days of camp life at Lee Lake. Leosky & Lediue's truck was specially placed at their disposal with Joe Konor at the wheel.

Tents, utensils and provisions were piled high, topped by happy and expectant boys, with the Scout and National flag over all, arriving at Lee Lake, the pleasant camping ground on the Parker ranch, at 4 p. m. Scout Master McCormick and Commissioner Jones had the big tent up in record time, mean while the boys had their first plunge in Lee Lake.

Thursday, Friday and Saturday were spent in swimming, fishing, hiking and berry-picking. All scouts present successfully passed their First Class swimming test of 50 yards.

Father McCormick having to return to Coleman on Sunday, Commissioner Jones took charge on Saturday night and Sunday morning.

On Sunday afternoon the above mentioned truck and driver made the second trip to bring back the Scouts and outfit, (minus provisions). For the boys, it was an unique experience, and will serve as a starter for another time.

Scout Master Father McCormick and Scouts of the Crusader Troop are deeply indebted to Dr. K. K. Lillie for the loan of a splendid tent, likewise to the Superintendent of the Road Crew at Crow's Nest Lake for the loan of the big tent, and had it not been Sunday, the boys were all anxious and ready to give three hearty cheers for Joe Konor and his firm.

British Railmen Leader To Tour Canada

J. H. Thomas, general secretary of the National Union of Railway men, is about to embark on a tour of Canada, says the Westminster Gazette. Mr. Thomas, who was instrumental in ending the British railway strike, is booked to sail on August 7th for a six-weeks tour of Canada.

Is Endeavoring to Organize Branch of Loyal Order of Moose

Mr. Ralph Perry, of Blairmore has been busy at work during the past few weeks enlisting prospective members in both Blairmore and Coleman in order to have a branch of the Loyal Order of Moose instituted at Blairmore early in September. Anyone desiring to become a member of this well known fraternal order are requested to get in touch with Mr. Perry.

Lote's Barred Rocks Well In The Lead

F. Lote's Barred Rocks, entered in the Alberta Egg Laying contest are making a wonderful record. This Hiltner pen has maintained the lead in the competition for 40 weeks. The pen now has a lead of 95 eggs and 124 points. The first bird has laid 239 eggs for the nine months. If Lote's prize birds maintain their pace they are likely to win by a wide margin. The following is the standing in the 40th week of the contest.

Name	Week	Total
Mrs. J.W. Cookson	46	1540

Buffalos To Be Sold At Wainwright

The rapid growth of the national herd of buffalo in Buffalo National Park, Wainwright Alberta, forces the government to seek other means of reducing the herds to proportions that are within the grazing capacity of the park, than that of shipping them to the wood bison range in the vicinity of Fort Smith. It has been decided to dispose of an additional 2,000 animals on the hoof, by tender, the understanding being that any animals so purchased will be slaughtered and the meat and hides disposed of by sale on the public markets. Last summer 1,634 buffalo were successfully transported by the Canadian National Railways to the northern range in the Northwest Territories, but this depletion of the herd was offset by the annual increase.

Many Visit Waterton Park

Waterton national park, in the south western part of Alberta, has had a total of 11,500 visitors to date, according to official registrations in the park, which shows the increasing interest in this more recently developed national playground.

Large Fur Sale

The largest fur sale ever held in Edmonton took place during the past week, when furs valued at over \$123,000 were sold, with buyers present from New York, Montreal, Seattle and other points.

LOCAL, PERSONAL AND GENERAL NEWS

Miss Marian Wilson left Sunday evening last for an extended visit to her old home in Scotland.

Mrs. R. Easton arrived home on Wednesday morning after spending several weeks with her daughter, Mrs. M. Morrison, of Midlandvale, Alta.

Misses Nora and Viria Plant left on Sunday night's train for Gleichen, accompanied to Calgary by Mr. and Mrs. G. Snood.

Mr. and Mrs. E. F. Gare and family arrived back in Coleman on Monday evening, after spending the past three weeks at Kaslo, B. C.

Mr. Ralph Matheson, of Winnipeg, is visiting this week with his brother, Mr. Jack Matheson.

Mr. W. L. Rippon arrived back in Coleman on Saturday morning last, after spending the past three months in the Eastern provinces.

Miss A. E. Houston, of the local post office staff, left Saturday morning for her old home at Nelson, B. C.

Mr. and Mrs. J. M. Allan and family arrived home on Friday last from a vacation spent at Leslieville, Alta.

Mr. and Mrs. Alex. Cornett, Mrs. Geo. Neil, Mrs. Thos. Flynn and family who have been spending a couple of weeks under canvas at Crow's Nest Lake, returned to town on Monday last.

Coleman's Population Shows Big Increase

According to the census figures given out at Ottawa on Wednesday, Coleman has a population of 2050, and Blairmore 1,611.

A farewell social was held last Friday evening in the Salvation Army hall, in honor of Mrs. J. Darnell, who was presented with a set of Stainless Knives from the Home League, her daughter Joyce, an Eversharp pencil and her daughter Phyllis a fountain pen. Speeches were made by the Captain, Mrs. Clapham and Mrs. Holmes, after which a most dainty lunch was served.

Messrs H. C. McBurney, W. L. Rippon and H. Antel, left Sunday morning last on a fishing trip to the North Fork.

Mr. T. Johnston is spending a few days in Drumheller with his son.

The Coleman Tennis club entertained the Fernie club here on Sunday last in an inter-club match, the latter taking three out of five events played.

Alberta Tax Commission

Dr. Torsy, chairman of the taxation committee appointed by the government of Alberta to study taxation and other financial problems, announces that the work is progressing most satisfactorily, and that considerable information has been gathered from all parts of Canada, the United States and other dominions. Sittings have been held during the past week, at which representatives of urban and rural municipalities have been heard in respect to their various taxation problems. The chairman and secretary have spent considerable time assembling and compiling the mass of documents which have come to hand, and in the preparation of comparative tables of revenues and expenditures.

Mr. Harry Gates, junior, who lost his foot in an accident at the McMillivray mine some time ago, is now walking around again with a new cork foot, of which he is mighty proud.

Mr. and Mrs. W. S. Bosworth are leaving on Friday of this week for Vancouver, B. C.

Messrs J. Houghton, Mayor Burns, T. Flynn, J. Lote, J. Salvador and M. Stiggell, arrived back in Coleman on Sunday last after spending several days fishing at the North Fork. They report a large catch.

The W. A. of St. Alban's church met at the home of Mrs. T. Johnson on Monday evening in honor of Mrs. W. S. Bosworth and Mrs. A. Kay who are shortly leaving the parish. These ladies have both been loyal workers in the interests of the W. A. and will be greatly missed from their circle. On behalf of the W. A., Mrs. Barrington, the president, presented Mrs. Bosworth and Mrs. Kay each with a handsome under arm bag, as a token of appreciation from the members. The ladies suitably responded with expressions of goodwill towards the W. A. A very pleasant social hour was spent and dainty refreshments served.

Stavely won from Coleman at bill on the local diamond 9-4, on Tuesday evening last. Owing to some of the local players not being able to change shifts, players had to be brought in from down the line.

Service in St. Alban's Church on Sunday, August 15th, will be held at 11 a. m. The new rector, Rev. A. D. Currie, will conduct the service.

Mrs. A. Kay, Miss Machin, and Messrs. R. Young, J. O. C. McDonald and Tom Young, attended the Conservative convention at Macleod as Conservative delegates from Coleman.

The many friends of Mrs. A. Lonsbury will be pleased to hear that she is getting well over her recent fall accident, and expects to be out of the hospital sometime next week.

Violet Wilson, youngest daughter of Mr. and Mrs. J. Wilson, 7th street, who underwent two operations for appendicitis, about three weeks ago at the local hospital, was sufficiently recovered to return to her home on Tuesday of this week.

Another interesting game of ball is scheduled for next Wednesday evening when Fernie will meet the local Cubs here in an exhibition game.

Mr. and Mrs. James Ford and family left on Saturday last for a two weeks' auto trip. After spending a day or two at Creston, the guests of Alex. Cameron, they will proceed to Spokane and on to Vancouver.

Cootie For Macleod

G. G. Cootie's many supporters and friends in The Pass were glad to learn that he was again nominated as Progressive candidate for the federal riding of Macleod. Mr. Cootie is one of the ablest and best members this riding ever had, and his supporters are out to see that he is again elected.

Mrs. C. W. MacKinnon left on Tuesday to spend a short vacation at Okotoks.

Mrs. Dora Falkon returned on Friday last from Great Falls, Mont., where she has been visiting for the past two months.

Mr. Harry W. Clark is leaving Saturday of this week to spend a two weeks vacation at Calgary and other points in the north.

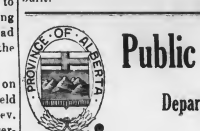

Mrs. J. Purvis and son, of Calgary, are the guests this week of Mr. and Mrs. W. S. Purvis.

At a special meeting of the Coleman school board last week Miss May Muir was appointed to fill the vacancy caused by the resignation of Sidney White, who is leaving shortly to attend the University at Edmonton.

In spite of absence on holidays of so many people and a stormy evening, the service in St. Paul's United Church was well attended, all but a few pews being well filled. Service at the usual hours next Sunday. At eleven o'clock the subject of the address will be "The Parable of the Sower." In the evening, at seven o'clock, the subject will be "Simon Called Peter." Those having no other church home are cordially invited to attend.

Lethbridge Northern Irrigation Tract Prosperous

The Lethbridge Northern Irrigation Tract, opened for settlement, is proving prosperous to the farmers operating there. In 1924 the total production on the tract was valued at least \$400,000. This year it is expected to reach \$2,000,000. New towns are growing up following the recent extension of the railway, and fine homes are now being built.

Public Sales of Lands Department of Municipal Affairs

Take notice that under The Tax Recovery Act, 1922, and The Sales of Public Lands Act, the following lands will be offered for sale at public auction, at 10 o'clock in the forenoon, at the places and dates as set out. The approximate acreage is shown opposite each parcel. Information as to any parcel will be supplied by the undersigned.

The above lands will be offered subject to a reserve bid and the reservations contained in the existing certificates of title, and reserving thereout all mines and minerals. Redemption may be effected by payment of the full amount of arrears at any time prior to sale. Terms will be announced at the sale, or may be obtained from the undersigned.

Dated at Edmonton, this 6th day of July, A. D., 1926.
W. D. SPENCE,
Deputy Minister of Municipal Affairs.

MISS LUVERA WEDS SEATTLE BUSINESS MAN

The marriage of Miss Antoinetta Luvera, daughter of Mr. and Mrs. Nicholas Luvera, and Mr. James Lambo, was solemnized Thursday morning at St. Mary's Catholic church with Rev. Gustave Tremet officiating. The church was filled with friends and relatives for the ceremony which was read at ten o'clock.

The bride's brunette beauty was enhanced by her gown of ivoryorgette heavily embroidered with crystals over satin. Her veil was of tulle, caught in a coronet of orange bicusoms and her shower bouquet was of lilacs of the valley, orchids and roses.

Mrs. John Lambo of Seattle was the matron of honor and the groom was supported by Paul Luvera, brother of the bride. Little Phyllis and Mary Lambo, of Seattle, were the flower girls, strewn blossoms in the path of the bridal party.

After the ceremony a wedding breakfast was served at the home of the bride on Seventh street to intimate friends of the family relatives and house guests and Mr. and Mrs. Lambo left for a motor trip to California. Upon their return they will spend a few days in Anacortes before going to Seattle where they will make their home.

The bride is a native of Italy, but has been in America for fifteen years, moving to Anacortes with her parents eight years ago from Coleman, Alberta.

The groom is also a native of Italy, but he has been in business for the past seventeen years in Seattle.—Anacortes American.

Why Many Homes Are Damp Inside

Builders agree that the dryness of a building depends largely on the insulating powers of its sheathing paper.

Hercules is the only building paper which offers 100 per cent. protection against winds and dampness. Its hard protective surface is obtained by using an exclusive coating preparation that is absolutely inviolate.

The reduced heating expenses more than offset the slight extra cost of Hercules

There Isn't Time

Preparing for a brief holiday at a summer cottage on one of our lovely Western lakes, the writer of this column tossed a few old magazines in his grip wherewith to pass an idle hour while belling under the trees. Glancing through one of these his eye was caught by an article appearing under the heading which appears at the top of this column.

How often are people heard to exclaim, "I haven't time," or "There isn't time," uttered by way of excuse for not doing something which ought to be done. And how false and shallow such an excuse can be! The necessary time can always be found for the discharge of one's duties and obligations if the will to do is in evidence.

But on the other hand, it is perfectly true that "there isn't time" for many things upon which, nevertheless, countless people expend an enormous amount of very valuable time, resulting in no gain whatever.

Time may appear long and slow of movement when measured by centuries and the history of nations, but it is fast and fleeting when gauged by the life of individuals. Men who have lived long and very active lives filled with noteworthy achievements have at the close of their careers expressed their regrets in the words, "So much to do, so little time."

Time, coupled with good health, is the most precious of gifts to mankind. Because the span of human life is brief, every moment should be put to the best possible use. Sufficient of it should be devoted to faithful pursuits and laudatory exercise and recreation in order that the body may be kept strong and physically fit to keep the mind alert and active and the body capable of the work it may be called upon to do. Only so can the best use be made of all the time allotted to the individual.

But, let it be repeated and emphasized, there isn't time in even the longest life for some things. Sorrow comes to all at some time or other, but "there isn't time" to waste in brooding over one's sorrows and losses. To do so merely means to waste the time which is passing.

There isn't time in this life for worry. Worry kills. It accomplishes nothing, but it is wholly destructive and undermining. It is right, proper and altogether sensible and prudent to take thought of and for the future, but never people confuse this desirable trait with needless, senseless worry.

"There is too little time to live for," says the poet. It is true, but we may be misled by the poet, for there is time enough to live for. We may be misled, however, and made the victims of false rumors. These things can and must be done, but "there isn't time" to let them long ago. Along with them there are also many things to make us happy and glad, and we need all the time there is for the bright and joyous things of life.

Life is too short for thoughts of malice, hatred and revenge. Wrong may be inflicted upon us, but by pursuing the even tenor of our ways, the mouth of the slanderer will be closed and his evil words effectually answered. "Life isn't long, just time for song and love, and things sublime. I'm not concerned with thoughts that breed."

Good friends, there isn't time. People there are who are so busy in this life getting everything out of it which seems to them important and worthwhile that they can find no time to think of and prepare for a future life in which we all believe, while there are others so absorbed with thoughts of that future life that they become neglectful of the duties and responsibilities of this life and their obligations to others, and the least and smallest of things become a constant atmosphere of gloom.

Both are wrong. There isn't time for such misconceptions of the true meaning of life.

In world, for most of us, he time well spent if once in a while in the quiet of an evening hour we make a mental inventory of our days, and weeks, and months, and carefully classified under appropriate headings, the use being made of the time allotted to us. Are we using this precious inheritance, which once neglected is immediately gone never to return, for the improvement of our minds, an increase in our talents and powers, and devoting all the best of which we are capable for the advancement of our race and for the welfare of our nation, and days on matters and things for which, after all, nobody really has any time to spare?

Plans For British Cruiser Disappear

Navy Has Been Keeping Details Of Armament Secret

Plans for the British cruiser Suffolk have disappeared. The Suffolk is under construction at the Portsmouth yard and details of her armament have been one of the secrets of the navy. The disappearance of the Suffolk plans recall that plans of the submarine K-2 recently were stolen.

It spelt the effect when a man gets angry during a religious argument. The business of the pastor is along various lines.

The Qu'Appelle Diocesan School For Girls

REGINA, SASK.

WHAT IS IT? This is a boarding school for girls conducted by the Church of England in the Diocese of Qu'Appelle. It is assisted by the Sisters of Saint John the Evangelist.

WHAT DOES IT DO? It teaches the usual course of studies of the public school, and the first three years of the university. It also teaches the education of music, dancing, drawing and domestic science. It supplies a splendid environment and a fine education. It is a boarding school for girls. It is a boarding school for girls. It is a boarding school for girls.

Big Family Of Settlers

Family From Minnesota Settle in the Humboldt District

Mr. and Mrs. John A. Stundbeck, from Minnesota, have recently settled in the Humboldt district with nine children ranging in age from two to 19 years. They bought 960 acres of land in this district and came with several thousand dollars in cash and effects and farm equipment valued at \$3,500. They made the trip from their home in Minnesota in a motor car and motor truck on which was built a house large enough to hold all the family, which is the modern style of covered wagon or prairie schooner in which settlers of today make their migrations. In the old days the old or mule-drawn covered wagon took days or weeks to cover long distances, whereas now the motor-driven prairie schooner makes the journey in hours or days.

Has Radio-Equipped Car The League of Nations assembly has a specially constructed radio-equipped Pullman car for emergency use. This car is to be used to take members to troubled areas in time of need.

Exports High Exports from Canada to Australia rose in March to the exceptional value of \$2,498,752, of which about half was for automobiles and parts.

A tame elephant eats more than one thousand pounds of green food and twenty-five pounds of uncooked rice daily.

Minard's Liniment for insect bites

Take Over Elevators

Saskatchewan Wheat Pool The Great West Wheat Handling Organization in the World

Elevators of the Saskatchewan Co-operative Elevator Company, Ltd., recently came under the management of Saskatchewan Wheat Pool, making the greatest wheat handling organization in the world.

The first payment of \$150,000 was made by the pool to the company by certified cheque. The pool previously had made a deposit of \$500,000 just prior to the meeting of the directors and shareholders of the company in April when decision to sell the company's elevators and holdings was reached.

The total amount to be paid for the elevator system of the Saskatchewan Co-operative Elevator Co., Ltd., by the Saskatchewan Wheat Pool Elevators, Ltd., is \$1,055,210.47 under the terms of the award handed down by a majority of the board of arbitrators.

Agony Of Lumbago Quickly Soothed Away By "Nerviline"

For the sharp, piercing pain of Lumbago, and the tormenting aches of Rheumatism, no liniment is so effective, so quick in bringing relief, and so good as "Nerviline." This wonderful liniment penetrates through the tissues very quickly, and reaches the core of the pain, draws the blood from the congested area, and thereby relieves the pain in a short time. Those who suffer from lumbago, swellings and Rheumatic conditions should use Nerviline the King of Pain destroyers. Get Nerviline today, 25¢ at all dealers.

Really a Language The call of the cricket is really a language. It is said to have been proved by a recent experiment when a female cricket was made to call through a telephone, whereupon a male insect at the other end of the line became excited on hearing the note.

RETAIN YOUR VIGOR

This Can Only Be Done by Keeping the Blood Rich and Red

If you would retain your vigor and ambition, keep your blood and nerves in good condition. Anemia, or thin blood, lowers the vitality, starves the nerves and causes a general run-down condition. When the blood is thin the skin loses its color, the shoulders droop and weight is lost. The victim of anemia loses appetite, suffers from indigestion, headaches and sleeplessness, and is nervous and exhausted after slight exertion. Do not delay but begin treatment now with Dr. Williams' Pink Pills for Pale People. You will be gratified with the prompt improvement in your condition. Among the thousands who have found new health through the use of this medicine is Mrs. Herbert Nagle, Lufkin, N.H., who says: "I had not been feeling well for some time and was gradually growing weaker. I would take dizzy spells and headaches, and was subject to severe headaches and found it hard to do my work. I took Dr. Williams' Pink Pills for Pale People, but it did me no good, and I was still growing weaker. In this condition I began the use of Dr. Williams' Pink Pills and in a short time found they were helping me. I continued the use of the pills for a while longer, and found that the trouble that had bothered me was gone and I was once more a well woman."

Get Dr. Williams' Pink Pills at your druggist's or write Dr. Wm. C. Cullen, Medicine Co., Brockville, Ont., and the pills will be sent post paid at 50 cents a box.

Regina Building Permits Building permits issued at Regina for the first half of 1925 amounted in value to \$1,728,619 as compared with \$97,166, for the corresponding period last year.

Several Chinese generals have issued edicts imposing the death penalty on any soldier found smoking opium.

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

DE FLOWERS' EXT-O-F WILD STRAWBERRY

It has been in use for over 80 years; its action is lightning, rapid, reliable and effective, and relieves promptly.

Turkish Women Are Efficient

Great Work Being Done By Them in Constantinople

Illusions regarding women have been broken right and left during the last few years. The first blow, however, comes from Kathryn Newell Adams, president of the Constantinople Women's College.

Miss Adams, who was in the United States for the summer holidays, said that Turkish women have an extremely active suffrage society, are clearing the streets of Constantinople from beggars, cleaning up the red light districts in the city, actively campaigning for prohibition, organizing trade schools for children, using the mosques as community centres, organizing mothers' clubs, clinics, milk stations, child health centres, and managing homes where beggars who have found on the streets are taken and taught an honest trade. In other words, Turkish women, lacking all administrative ability and efficiency, that western nations have pictured them to be.

The Empire's Food Supply

Faced With Shortage Britain Would Turn to Dependence on Dominion (Sinc)

Great Britain can feed only two-fifths of its people from its own resources, it is fairly obvious that a world shortage in food would hit Great Britain first and hardest. Great Britain's hope of escape from the worst consequence could only be in the empire. Yet what measures have been taken to ensure that empire resources should be at her command in any such dire development? The Australian and South African opportunities in beef are neglected in favor of foreign supplies. West Indian sugar has been victimized by foreign—and inferior—produce, and even Canada, which finds his way to the United States whilst the United States export to us—London United Empire.

Armless Artist Wins Honors

Work of Japanese Girl Sold For Large Sum

A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokyo art circles by carrying off the honors at the "Perseus" School exhibition. Holding specially constructed brushes between her teeth, Miss Yoneko Yamaguchi, the armless artist, had for several years painted oil, the decorative work of which was highly praised. Some of her work at the exhibit sold for as much as \$500. Miss Yamaguchi was to have been a gelsa girl. After she had learned the samisen and guitar, which were the Japanese lute business man, one night her father suddenly became insane, killed her five brothers and sisters and cut off her arms.

England's Strongest Man

Blacksmith Bends Steels Bars and Easily Lifts Great Weights

J. C. Price, of Gloucester, England, is known as "the strongest man of the world." He bends a four-inch horseshoe nail double with his hands, and holding a bar of horseshoe steel in his teeth he takes one end in each hand and bends the bar into a loop. He can lift a 420 pound weight from the ground to his knee. Price has been a blacksmith for 30 years. He is 43 years old. His height is 5 feet 10 inches and he weighs 220 pounds. He has a chest measurement of 50 inches.

It Bids Pain Begone—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Rumania's Queen Economizes

Has Adopted Peasant Dress Excepting On State Occasions

Queen Marie of Rumania, in the interest of economy and simplicity, has adopted Rumanian peasant dress. Only at court ceremonies or elaborate state occasions does she wear European silks or satins. Even while dining in the streets of Bucharest she may be seen any day attired in the picturesque hand embroidered linen costume of the peasant woman, with designs worked in gold, red or blue thread, with a flowing kerchief worn around her head, a bright red and white hand-knotted apron, and red leather boots.

Wins Bucking Contest A nineteen-year-old boy, Jack Cooper, of Calgary, riding a horse aptly named "Dynamite," won the Major Fred Brewster challenge trophy in the bucking horse contest of the first annual show of the Jasper Horsemen's Association, held on the Henry House Plaza in the Athabasca Valley.

Keap Minard's Liniment handy

Corner on thee, little pest Filthy fly, unwelcome guest!

No need to tolerate a single fly in your house. Fil flies kill.

Fly spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Fly spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Fly on your garments. Fil kills moths and their larvae which eat holes. Extensive tests show that Fil spray did not stain the most delicate fabrics.

Fil is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Fil has replaced the old methods because it kills all the insects—and does it quickly. Get a Fil can and a sprayer today.

Ultra-Violet Rays

Research Work Commenced on the Power of Invisible Rays to Produce Vitamines

The power of the invisible ultra-violet rays to produce different tints and degrees of brightness in different materials has been vividly illustrated to New York theatre audiences, because this power has been used for the production of Science with effects in recent years.

Costumes were brilliant in color under ordinary light are made to blaze and gleam with many hues under ultra-violet rays.

These spectacles were based on the researches of Professor R. W. Wood, of Johns Hopkins University. By flooding a number of the Association of the Advancement of Science with ultra-violet rays in 1921 he gave the first public exhibition of the odd effects since popularized on the stage.

Ultra-violet rays have since been used widely in deciphering palm-prints, or two-writings manuscripts.

In the last year research has been concentrated on the power of ultra-violet rays to produce vitamines.

For Scalds and Burns—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

Fable For Dentists "Doctor," said the patient to the dentist, "I haven't a single decent excuse to offer for neglect of my teeth. I have had plenty of time to spare to have them attended to, no sickness in my family or press of business to keep me away from your office, and no lack of money to pay for the work. The truth is, I am just a plain, miserable coward."—Life.

Where Men Are Barred Trighton is the proud possessor of the first flat in all England built exclusively for women. The first flat was dedicated by Lady Emmott. Each flat is self-contained, and the occupant may have children or a woman companion—no husbands or anything of the kind. The rent averages about \$17.5 a week.

Only the uninformed under the agency of our country. The knowing apply Holloway's Corn Remover and get relief.

A bachelor says: "Before taking the leap through the wedding ring a man should be sure that the net of matrimonial bliss is properly stretched on the 'other side.'"

THURSDAY, AUGUST 12, 1926

Boost Coleman.

When you say everything is dead around this town stick a pin into yourself and see if YOU'RE alive.

Many of our streets are too narrow for present day traffic because our forefathers—bless them—had only a horse-and-buggy vision. They are not to be blamed for that; but WE will be blamed if in all that we undertake in public improvements of a permanent nature we fail to provide for the advancing times.

Sensation Must Be Served.

George Hasler Johnston tried to walk from Chicago to New York without food, under a bet of \$1000. If he had made it he would have had a thousand dollars and a ruined body. He gave up at half the distance. If it were a question of endurance he might as well have run a lawn mower back and forth across his lawn, or engaged in some useful but less spectacular work. Man cannot live on water alone. Human energy is wasted when the goal attempted holds no productive value. Instead of fooling the people Johnston fooled himself.

Summer Tonic For Business.

Barring calamity, disaster or direful slump, Business generally is good.

There is plenty of Business for the fellow who goes after it.

The trouble about Business is, we don't all go after it.

The reason Business is not easy to get is because it is not so easy to think that it is easy to get.

In itself, Business is abstract and visionary; to be concrete it must be created, nurtured, watched and maintained.

The will to do must join hands with physical and mental effort, and the result is Business.

Some people go to Europe by rail. That is, they lean over the rail most of the way.

We've been to the Poles this spring; now let's all go to the polls this fall.

It doesn't make much difference whether there's a war on or not, we all have to fight for a living.

Ten years to life is a short sentence for a judge to say but a long one for the prisoner to serve.

The only reason a lot of us don't have to go to the poorhouse is because we're already in one.

If it's true that people are made up of what they eat, too many folks have been eating greens.

Keep sweet. There's sugar even in a lemon, but you've got to analyze it to bring it out.

One great economic waste is killing a perfectly good sheep to make a college diploma.

It seems that some industrial plants can't grow without watered stock.

The hand that used to rock the cradle now jolts the flivver.

The Vast And Varied Agricultural Possibilities Offered To The Settler In Canada

Canadian settlers are drawn from nearly every country in the world, and as vast and varied are the agricultural possibilities in Canada with respect to soils and climate that every settler should have little trouble in finding employment best suited to his particular taste or education.

The agricultural map will give some idea of the extent and distribution of Canada's fruit, ranching, dairying, wheat and mixed farming lands as they are to be found today.

The gardener can grow apples, peaches, pears and small fruit in the Niagara district of Ontario, or apples and small fruit in the Annapolis basin of Nova Scotia, and a variety of fruits in the Okanagan, Kootenay or New

Western Canada finally captured the faith of the land-seeker, when the Dominion's reputation for its climate and fertility were definitely swept away, more rapidly than they had ever before invaded a new country.

In the period 1901-1921 the territory embraced by the present provinces of Alberta and Saskatchewan increased eight-fold in population, and the occupied farm lands spread over some 85,000,000 acres.

But it is not for fruit, ranching, dairy or even wheat farming that the settler and farmer are now turning their attention, but to mixed farming. This is becoming more and more noticeable as the years go by and the country

Modern Ideas In Old Book

Early Work on Kindness to Animals Is Being Reprinted

A treatise entitled, "The Rights of Animals," prepared by Herman Daggett in 1791 as a thesis in taking the master's degree at Providence College, now Brown University, has just been reprinted by the American Society for the Prevention of Cruelty to Animals.

It was printed at Sag Harbor, Long Island, in 1792, and is said to be the first American work on humane treatment ever published. Copies are so rare that it has remained unknown except to a few collectors. An official treatise, the work is considered of such excellence that it has been reprinted for free distribution, according to the introduction by Edward P. Buffett, in the hope that the sympathies aroused by it may not be limited to the readers who get acquainted with it, but may awaken humane feelings in other countries, the abolition of the steel trap.

Who's Who In Wheat

J. C. Mitchell, of Dabinda, Saskatchewan, Will Try Again For Premier Honors In Wheat

Based on a press report stating that J. C. Mitchell, of Dabinda, Saskatchewan, intended to try to win back the wheat crown at the International show at Chicago, the New York Sun recently published the following editorial under the heading, "Who's Who In Wheat?"

Montana applied to the world its champion wheat, greater last year, when J. P. Yates, of Fitchell in that state captured the title as the International Grand, Hay and Stock Show in the autumn in Chicago, but Canada does not intend to let the honor stay south of the international boundary if its farmers can give it north.

Domination now announces that J. C. Mitchell, of Dabinda, Saskatchewan, who has already been cock of the walk three times, will be a contestant this year. Mr. Mitchell was not in the contest in 1925, but he will be on the slope of Lake Michigan this year.

This international competition was instituted fifteen years ago, and Canada has taken the blue ribbon thirteen times. Senator Wheeler of Montana, Saskatchewan, succeeded in finding top place five times. Nobody else touches Mr. Wheeler's record in this achievement.

Canada's hope this year has a typical pioneer's history. He came to America in 1906 from Manchester, England. He did not have any capital. He took up a quarter-section of land, fifty miles from the railway and went to work. Now he farms 500 acres and is asking the Canadian department of agriculture to register a new potato he has developed which appears to be all that a spud can aspire to be. Today a railroad crosses the Mitchell farm and the homestead is a show place.

Mr. Mitchell has spent very little time telling other persons that there is not chosen for a man today. He went out seed in this case with a few dollars and he did not make it by loading during the wheat seasons either.

Dominion Land System Of Survey, Has Proven To Be The Most Desirable In Every Way

The Cultivation Of Corn

Intensive Cultivation Seems Necessary To Assure Success

The following bulletin was prepared by Mr. C. D. Matthews, expert specialist of the Dominion experimental station at Indian Head, at the request of the Saskatchewan Corn Growers' Association, with a view to especially assisting the beginner in order that he may secure the best possible results in raising his corn crop.

The corn is doing well. We must keep it that way. This depends upon the grower. The grain crop is now depending on the weather. The corn crop demands cultivation.

There are a few common reasons for the failure of the corn crop:

1. Destroy weeds.

2. Conserve moisture.

3. Mix the soil conditions.

4. Improve the physical condition of the soil.

5. Germinate dormant weed seeds.

6. Give the plants a loose soil in which the roots will grow better.

7. Destroy organic matter, and control soil temperature.

The type of cultivator to be used will depend on the type available, but it must do the job well. The first cultivation which is done soon after the plants are up should be done with a shallow cultivator, and fairly close to the plants. Subsequent cultivations should be shallower and not close to the plants. Four or five inches deep for the first cultivation and two to three for the others is a fair gauge. At least four cultivations are required. The last ridged cultivation is the better.

If you have a variety which matures in your area, you will be anxious to secure seed in this case with the number of plants per hill to three or four. In rows, this plants to a foot apart when young. A small area treated in this way will bring striking results. If you are feeding sheep or a thick stand is better.

Cultivate your corn crop as often as you can before it gets too high to work in properly. Remember the biggest object in cultivating corn is to kill weeds.

Nowadays one hears of community settlements and the advantages of grouping people in such a way that they will get the most out of the amenities of modern civilization. One carries the idea to its extreme so that the farms radiate from a central community has always brought forth objection and laid out in its irregular shape or any other form departing from the square or rectangle. Even the rectangle is sometimes considered objectionable if the length greatly exceeds the breadth as the distance the farmer would have to travel to do his work at the rear end of the farm would then be too great.

To trace the rectangular farm to its beginnings goes back to the days of the ancient Romans. It is recorded that the system of division of lands by meridians and parallels was handed over to the Romans by the Etruscans, a people who really practiced agriculture in Italy. This division of the land by two lines had religious and magical foundation. The unit of square measure was the "jugum," which was approximately five-eighths of an English acre. In subdividing the lands of a colony, squares or "jugera" were often used. Each of these was called a "centuria" and was 2,500 feet square, or a little more than three-quarters of the size of the quarter-section farm unit of Western Canada. They were further divided into the individual holdings, which ranged from two to ten jugera or larger.

The rectangular system of survey based on meridians and parallels, was first instituted in America in 1785 by act of the congress of the United States. The first survey of the public lands. The first survey was in Ohio, where a principal meridian was established and at right angles thereto a base line from which the sections of townships were projected. As the survey was extended, principal meridians and base lines were laid out in each state until at present there are over 20 meridians and almost as many base lines.

There has been a great deal of speculation as to who introduced the system of subdivision of land into America. One theory is that it was Colonel Bouquet, who in 1764 was asked by General Gage to report on a system of subdividing land for settlement in the vicinity of Fort Pitt. Thomas Hutchins was the surveyor who assisted General Bouquet, and was the first to actually apply the system in 1785 he was delegated to stake out public lands in the state of Ohio. It is Colonel Bouquet who originated the rectangular system of America, then it may be said that the idea came directly from Italy, for although born in Switzerland this officer served under the King of Sardinia in Italy before coming to this country.

No doubt one of the fundamental reasons for the adoption of the rectangular system in America was on account of the simplicity it offered in the description and registration of land. Where townships are laid out from meridians and parallels, the definite geographic position is allotted to each township whether it is surveyed today or in the future. The townships fit together with a few fractional parcels.

The rectangular system of survey by sections, townships and ranges, based on astronomical north-south and east-west lines was selected for the subdivision of Western Canada. This Dominion land system of survey has proven to be most economical for the purpose and is the most comprehensive, also uniform system of survey in the world. Under it about two hundred million acres of land have already been surveyed by the Topographical Survey, Department of the Interior. Plans of more than 7,000 townships have been printed—the official documents accepted in all courts as adequate descriptions of land—Moose Jaw Times.

MAP OF CANADA SHOWING AGRICULTURAL POSSIBILITIES

Westminster districts of the United Kingdom. The development of commercial nut trees is a recent and successful development in Southern Ontario and British Columbia.

In the foothills of Alberta, in some of the British Columbia valleys and in Southern Saskatchewan there can be obtained some of the finest ranching districts to be found the world over. When His Royal Highness the Prince of Wales decided on ranching as a recreative hobby, it was in the Canadian western foothills that he made his choice.

The jelly shepherd too can find his dream of the dairy parts of Nova Scotia, and in the grazing districts of Southern Saskatchewan, and Southern and Southwestern Alberta, as well as in the central highlands of British Columbia. Nearly every variety of sheep can be, and is being, raised on the prairie in Saskatchewan and Alberta, from the Karakul (Persian lamb) sheep near Calgary through the Shrop, Leicester, Cotswold, Shropshire, and Hampshire, to the finer wooled breeds, Southdown, and Merino. A small number of Scotch Black Faced, Suffolk, and Cheviots are also found throughout Canada, but their numbers are not increasing very materially.

The stronghold of the dairy farm has been Southern Ontario and Southern Quebec and rightly so, as these districts are suited to intensive farming and are near large markets, and also shipping ports, where butter and cheese can be disposed of at remunerative prices. The prairie provinces are also making rapid strides in the production of butter, and their progress during the past few years has been nothing short of phenomenal. At a dairy show held in London, England, recently, an Edmonton dairy won the first prize in the milk but, for class, and the second prize for the Shrop Lamb (Manitoba) Creamery. In the unassisted class a Regina creamery won the premier award.

The fruit and dairy farms have, however, been vastly eclipsed by the fame of the western wheat fields. Perhaps no other natural product, whether of agricultural, forest, mineral or marine origin, has exercised such vitalizing influence upon the economic life of Canada in recent years. Wheat has been the most powerful factor in attracting population and capital to the Dominion, in bringing virgin areas under cultivation, in widening the market for domestic manufacturing, mining and other industries, in building up the volume and value of export trade, and in creating the purchasing power necessary to finance Canada's heavy imports of textiles, iron and steel, sugar, coal and other essentials which, for various reasons, are drawn wholly or largely from abroad. The statistics of yearly crops give a fair picture of the manner in which wheat has impelled the material progress of Canada. When

becoming more densely populated. The large wheat fields of the west near the larger centres of population, as for example near Winnipeg, Regina, and Edmonton, are giving place to the dairy and mixed farm, where milk, butter, to a limited extent, cheese, pork, mutton, eggs, poultry and grain are produced, and give steady employment and income to the year round, instead of a summer of rush and a winter of leisure. The principle of the mixed farm has spread throughout the province from coast to coast, more particularly where the farms have to be cleared of bush and are consequently smaller.

Saskatchewan Seed Growers

J. F. Warren, Bellevue, Elected President At Annual Meeting

George Spence, former member of the "Crest" and first president of the Saskatchewan Seed Growers' Association, held their annual meeting. W. J. F. Warren, Bellevue, Sask., past vice-president was elected president. M. Y. Tullis, Saskatchewan field crops' commissioner, was re-elected secretary and general manager, and W. J. Mantle was elected treasurer.

Members of the pool stated at the close of the meeting that a fine feeling of co-operation had prevailed throughout the gathering and that they believed the success of the pool was assured.

Bees Like Sweet Clover

No Nectar Is Wasted From This Valuable Pasture

There is no doubt regarding the value of sweet clover as a bee pasture. When sown in a crop of sweet clover at Woodland Farm the field was literally covered with millions of honey bees, and they stayed with the fresh blossoms until the last of them went into the silos. The bees seemed to be doing their best to prevent the destruction of so much valuable nectar. Farmer's Advocate.

Reducing Weight

One of the grave mistakes common to overweight persons is to decide suddenly that their superfluous flesh must be removed quickly. Reduction in weight should proceed slowly. It is impossible to maintain health on a drastic reducing programme. One cannot expect to take off in two months what it has taken years to put on and survive the experience in perfect health.—Liberty.

Saskatchewan Harvesters

Saskatchewan's gang of harvesters for the 1925 crop will number 25,000, it was announced by G. J. Tomsett, general superintendent of the clearing house, provincial government employment service.

Laughter is the sound a man hears when his hat blows off.

Better Awards At Regina

Inter-Provincial Blue Ribbon Competition At Regina Exhibition

The Northwest trophy representing the Inter-Provincial blue ribbon in creamery, butter awards at the Regina exhibition was won by the Crested Farmers Company, of Brandon, Man. after this company had secured first place in the Manitoba section for the provincial sweepstakes, with Belmont Creamery in second place.

For the Northwest trophy the Manitoba companies were in competition with Central Creamery, Calgary; who took first prize, and Edmonton Pure Butter Company, second prize in the Alberta section, and in the Saskatchewan section, the Lloydminster branch of the Saskatchewan Co-operative Creameries was first and the Regina branch of the same company, second.

C.N.R. Official Made Indian Chief

W. A. Kingsland, general manager of western lines, Canadian National Railways, during the Saskatoon exhibition was made chief of two Indian tribes. Chief Whitecap, son of a famous refugee from the United States at the time of the Custer massacre, and Chief Charles Eagle Crow of Saskatchewan, performed the ceremony.

Doukhobors Would Go To Alberta

Considered by Alberta Government

Whether or not Alberta wants more Doukhobor settlers is a question now being considered by the provincial government. The matter came through the recent request of the Doukhobor Colonization Society for settlement in the Peace River country and the likely attitude of the Alberta Government towards such a project.

As announced at the time, there are said to be 5,000 of these people in Russia who are desirous of migrating to Western Canada.

The premier said careful investigation will be necessary.

Watkins—"I think Jackson must have been educated in Russia."

Watson—"What makes you think so?"

Watkins—"He's always talking about his little red shoonies."

Flapper—"Should I marry a man who lies to me?"

Fortune Teller—"Lady, do you want to be an old maid?"

Record Gold Output

Gold and Platinum Produced in Canada in Increasing Quantities

A record quantity of gold is being produced in Canada. Figures recently issued by the Canadian Government bureau of statistics show that in 1925 the output was 1,735,725 fine ounces worth \$25,850,425. This was an increase of 210,252 fine ounces over the 1925 production.

In 1925 Canada produced a total of 5,684 fine ounces of platinum worth \$1,925,182. Other metals in the platinum group, palladium, rhodium, iridium, etc., the Dominion's output that year was 8,238 fine ounces valued at \$464,960.

The bulk was mined in Ontario, which produced 1,451,629 fine ounces. British Columbia was second with 219,227 ounces; the Yukon produced 47,817 ounces; Manitoba, 4,423 ounces; and Nova Scotia and Quebec, 1,601 ounces apiece.

Of the platinum, 8,893 ounces was derived from Canadian ore treated in British and United States refineries. Practically all of this came from copper-nickel ore in the Sudbury district.

No doubt one of the fundamental reasons for the adoption of the rectangular system in America was on account of the simplicity it offered in the description and registration of land. Where townships are laid out from meridians and parallels, the definite geographic position is allotted to each township whether it is surveyed today or in the future. The townships fit together with a few fractional parcels.

Many Visited Livestock Train

Total Attendance Through Saskatchewan Was Over Eight Thousand

After a three weeks tour through Saskatchewan the livestock train fitted out by the department of agriculture returned to Regina. There was a total attendance at the various places visited by the train of over 8,000 visitors. The animals displayed, the Shorthorn breed was most in demand, 25 Shorthorns being sold, together with four Polled Angus, four Red Polls, three Ayrshires, two Holsteins and one Hereford.

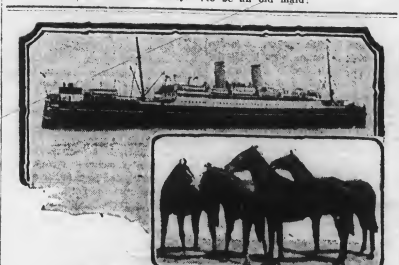

These stock completely cleared out the stock of pure-bred sires in the department of agriculture, with the exception of the Hereford bull which won the junior championship at the Regina spring show, and two Holstein sires. Twelve scrub bulls were bought by the livestock men in exchange for purebred stock.

Southern Alberta Sugar Beets

There are seven thousand acres cropped to sugar beets in Southern Alberta this year, a thousand acres more than last year. Early prospects are for a good crop.

Muscelini In Good Company

Jan Toop, famous Dutch painter, is busy with a study of which the central figure is St. Paul. Toop says his work will include the structure which dominates the present, the St. Paul, St. Theresa and Muscelini.

Derby Winners Strain for Canada

Twenty-five thoroughbreds coming from all parts of Great Britain and Ireland were unloaded from the Canadian Pacific train Metagama in Montreal "ready" for shipment to the Atlantic breeding and training ranch near Winnipeg, where they went by fast freight later. Several of them were finely bred animals, counting winners of the English Derby and Grand National in their stables.

Interviewed at the wharf, A. Mulian, owner and shipper of the horses, said they had been collected all over England and Ireland, brought together at Dublin and thence sent to Southampton for shipment to Canada by the Metagama. They had, he said, come through the voyage in first-class condition and after a few weeks' training and acclimating, would be ready in some cases to race. Mr. Mulian has been in the thoroughbred raising in

The GREATEST McLAUGHLIN -BUICK EVER BUILT

An Engine Vibrationless Beyond Belief

The McLaughlin Motor Car Company, Limited, today presents the 1927 McLaughlin-Buick, with an engine vibrationless beyond belief.

This achievement, we earnestly believe, will rank as one of the most important in all motor car history.

Our engineers, working in conjunction with the engineering staffs of General Motors Research Laboratories and General Motors Proving Ground have divorced the annoyance of vibration to a point never before attained.

They have given McLaughlin-Buick motor cars a new luxury of quietness at every speed, exceptional among all cars, no matter what their price.

Never in all the twenty-two years of McLaughlin-Buick success has there been offered such convincing proof of engineering and manufacturing leadership. McLaughlin-Buick offers you today a brilliant example of the quality of McLaughlin-Buick craftsmanship—Confident that acquaintance with its performance and value will fix in mind the conviction that money can buy nothing finer—

Certain that you will discover, in this great new car, further evidence of the deep meaning in the longstanding pledge: "When Better Automobiles are built, McLaughlin-Buick Will Build Them."

Four Vital Engine Improvements

To produce the silent power-flow in the 1927 McLaughlin-Buick, McLaughlin-Buick engineers have made four fundamental improvements in the structure of the famous McLaughlin-Buick Valve-in-Head engine, including a Counter-Poised Crankshaft and a Torsion Balancer; new light-weight pistons; and then a Completely Cushioned Engine isolated and isolated by rubber mountings, fore and aft, from all metallic contact with the chassis.

Other Vital Improvements

Another revolutionary improvement in the 1927 McLaughlin-Buick is the vacuum-cleaned crankcase. Crankcase moisture, the vicious foe of engine efficiency, is now drawn out of the crankcase before it has an opportunity to do harm. The crankcase is cleaned and kept free of dilution by the McLaughlin-Buick Vacuum Ventilator, a new device, operated by the air flow positive and certain in action, and without a single moving part. The oil in the crankcase of the 1927 McLaughlin-Buick need be changed only four times a year!

McLaughlin-Buick performance is now made more certain, more pleasant and more economical by thermostatic control in the cooling system. Water circulation is prevented and the best held in the engine, until the proper operating temperature is reached.

Gear noise is removed by McLaughlin-Buick's new gear-tooth transmission, which is quiet in all of its speeds. Further quietness has been obtained by a new muffler design.

And in this remarkable new car McLaughlin-Buick introduces balanced wheels, another contribution to better driving.

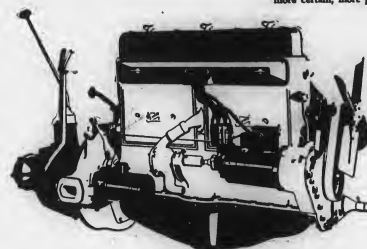

The princely luxury of the new Fisher bodies is in thorough keeping with the unusual and incomparable performance standards now attained.

The Most Remarkable Fact of All—Value

This Greatest of all McLaughlin-Buicks is the Greatest of all McLaughlin-Buick values. McLaughlin-Buick volume has permitted engineering research and development on a scale far beyond the reach of most manufacturers.

Constant improvement has leveled one price barrier after another, until now you are offered, in this new McLaughlin-Buick, a car as fine as money can buy, at the price of cars of very ordinary quality.

This car will convince you, as no other car can, that money can buy nothing finer—no matter how much you may be able to spend!

WHEN BETTER AUTOMOBILES ARE BUILT—McLAUGHLIN-BUICK WILL BUILD THEM

The Study of Stringed Instruments as a Power in Education

(Continued from last week)

Coming now to the study of chamber music, the highest form of the stringed players art, we have to consider further influences in this educational power. The earliest possible start should be made, beginning with duets for two violins, miniature sonatas for piano and a stringed instrument, and the simplest of trio movements. From these progress will be made step by step up to the works of Haydn, Mozart, Beethoven, and all the classical and modern composers. I am speaking of the string quartet as the ideal. There is, however, a world of exquisite beauty in other forms of chamber music—trios, quintets, sextets, and various combinations of strings with other instruments. All such works should be studied as opportunity offers, or as an opportunity may be made.

The first thing that young students will learn in the study of chamber music is absolutely no possibility of any kind of competition, but an equal absolute necessity of sympathetic co-operation. The benefits and delights of this will be quickly realized and a valuable lesson learned for application of the things in life generally. As the study proceeds, that sympathetic co-operation will have to deepen into a still more sympathetic understanding, until the players are literally of one mind, having the same thoughts and the same emotional feelings.

In the practice of this kind of work, there is again the demand for intense concentration that the players may be ready at any moment to understand each other's thoughts and feelings, expressed in all the various shades of rhythm, phrasing, quality and volume of tone. This concentration is however never a strain, for it is the natural result of a spontaneous and lively interest—a love that deepens as each artistic achievement reveals fresh beauties and new joy.

It has been said that the first aim of education should be the training of the imagination. Could there be any more effectual means than the fine and delicate art of violin playing? And when this becomes the art of concerted chamber music, in which it is necessary for each player, not only to give free vent to his own imagination, but also by sympathy, to follow the imagination of his fellow artists, and feel its inspiration, then surely we have a force for education in its truest and most exalted form. Add to this

those faculties which as we have seen, the study of a stringed instrument of necessity develops—control, patience, observation, perception, concentration, forethought, and determination—and does it not appear that the study is worthy of consideration as an educational force?

Let the children find the joys of music by experience and in participation. Incidentally we shall lead them to a richer manhood and womanhood, free from self-consciousness, and having all their faculties trained to achieve greater things than yet the world has known.

Magazine Editor Buys Ranch

Frazier Hunt, associate editor of Cosmopolitan Magazine, has purchased a ranch in Alberta, in the neighborhood of the Prince of Wales ranch near High River. Mr. Hunt has been spending the summer in Alberta.

St. Paul's United Church of Canada

Sunday, August 16th
10 a. m. Sunday School.
11 a. m. Morning Worship.
7 p. m. Evening Service.
You will enjoy the congregational singing.
Strangers and visitors cordially invited to the services.

H. J. Bevan, Minister.

Danish Visitor

A visitor to Alberta the past week was S. Sorensen, agricultural advisor to the Danish government, who is attached to the Danish legation at Washington, D. C. Mr. Sorensen is paying his first visit to the Canadian West and is studying general agricultural conditions and particularly the swine industry.

Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unexcelled quality, phone No. 18, THE COLEMAN FLOWERING CO., LTD., agents for Frache Bros., Lethbridge, advt.

WARNING

CAMPERS OR TRAVELLERS
Camping or travelling without a permit is prohibited on—
Section 6 and 7, Township 9, Range 4, and Section 1 and 12, Township 9, Range 5, West of the 5th Meridian.

This section is taken under the provisions of Section 71 of the Forest Reserve Regulations, and its restrictions will continue in force only as long as in the opinion of the Forest Service it is necessary in the interest of fire protection. Your co-operation is solicited.

By order,
E. H. Finlayson,
—50—2 p. Director of Forestry.
